BE WELL AND GREEN WHEN DIGITAL

Project goals

- to build capacities in **“healthier and more responsible use of digital technology”** and to develop competences up to proficiency level 7 of the DigComp framework and promote **„smart habits”** for tech – smart high school teachers and students.

Priorities

- addressing **digital transformation** through the development of digital readiness and resilience, and to protect the environment and fight against climate change.

Aims

- to **build awareness** in High Schools by enabling teachers and students to safeguard themselves and the environment against a number of risks when using online tools and technological devices.

Expected project results

- **BeWEEN training programme**
- **Educational mobile game**

▼
**PROTECTING HEALTH AND WELL-BEING
PROTECTING ENVIRONMENT**

▼
TEACHERS ARE THE KEY!

About project

The name of the project, from the **ERASMUS +** programme, is hidden in a symbolic acronym – **BeWEEN**, meaning **“Be well and green when digital”**. The project is of action type **KA220-SCH-Cooperation partnerships in schools**, taking place in the school education field [TK1].

BeWEEN

Partners

Centre for Peace, Nonviolence and Human Rights – Osijek
The University of Vienna
The National Technical University of Athens
Future Needs Management Consulting Ltd.
Centre of Technical Culture Rijeka

BeWEEN will contribute to:

- **Improving the level of key digital competences and skills of High School teachers, with the aim to transfer this knowledge to students.**
- **Promoting and strengthening the European lifelong learning area, by contributing to the dissemination, multiplication and replication of the use of European transparency and recognition tools.**
- **Impact on EU policies concerning the safe and responsible use of digital technology.**
